

## on-line process control

SCITEQ **on-line** wall thickness measuring equipment:

X-ACT, on-line pipe measuring system for multilayer and single layer pipes up to 630 mm

X-ACT TwinEye, on-line high speed pipe measuring system for multilayer pipes: aluminium barrier pipes etc.

## finished and semi-finished products

SCITEQ **pressure testing equipment:**

Internal pressure testing equipment up to 100 or 160 bar

Burst testing equipment up to 200 or 300 bar

Cycle testing equipment

High Capacity Pressure testing equipment, up to Ø3000

Transportable pressure unit up to 100 or 160 bar

PC SCITEQ software

Thermo tanks, 19° to 95°

End closures for pipes: PE, PP, PVC

End closures for fittings: PE, PP, PVC

SCITEQ **impact testing equipment:**

B50 impact tester, vacuum

Impact weights from 250 gram to 16000 gram

Scientific instrumented impact weight system

Charpy and Izod impact testing equipment

0° C Cold water tanks

Conditioning chambers

SCITEQ **off-line wall thickness**

Pipe wall thickness measuring device, manual

SCITEQ **tensile and compression**

1 KN to 100 KN tensile and compression equipment

Grips and compression plates

Load cells

Extensometers

Creep testing equipment

SCITEQ **TC thermal cycling equipment:**

TC micro system with LCD touch screen, up to 2 x Ø50 mm samples

TC SCITEQ software

SCITEQ **various products:**

Methylene chloride temperature testing equipment

Glycerine testing cabinet for heat reversion test

Heating ovens

Flow testing equipment

Combined testing rig

Rapid Crack Propagation testing equipment

Temperature tensile test apparatus

SCITEQ | equipment

Danish origin

worldwide sales

high quality

flexibility

*- We believe in success through dialogue*

SCITEQ — A Brand of Quality

## raw material testing

SCITEQ raw material testing equipment:

Melt flow index

Density test equipment

HDT/Vicat test equipment, 3 or 6 stations

Hardness testers

Apparent density/bulk density apparatus

## auxiliary equipment

SCITEQ auxiliary equipment:

Copy milling machine

Walking beam die cutter

MCT milling machine

Axial notch milling machine

Laboratory saw, for cutting pipe samples

End closure mounting / demounting machine

Caliper rulers

Hand gauges

Microscope and microtome

Circumference tape and micrometer

Vibrating sieves

Parallel scratcher
